# C1 SmartCloud Configurator

Multi-Tenant Compliance & Governance Engine

C1 SmartCloud Configurator enables secure, compliant multi-tenant deployments for regulated community cloud environments. It applies pre-built regulatory templates, automates tenant onboarding, enforces segregation and governance boundaries, and delivers centralized oversight for FedRAMP, StateRAMP, CMMC, IL4/IL5, HITRUST, ISO, PCI, and other frameworks.
Automated Onboarding

Multi-tenant onboarding with segmented data & access boundaries

Regulatory Templates

Pre-built compliance templates with policy & evidence inheritance

Centralized Oversight

Cross-tenant dashboards for readiness, risk & governance

Key Use Cases

- **Multi-Agency Shared Services** — consistent onboarding across agencies
- **FedRAMP/StateRAMP Community Clouds** — standardized baseline inheritance
- **Defense Ecosystem (IL4/IL5)** — enforced separation & governance
- **Healthcare Consortium** — unified HITRUST/PHI oversight
- **Financial Community Clouds** — aligned FFIEC/PCI control deployment

Proven Outcomes

1

70% Faster Onboarding

Accelerated tenant deployment

2

Reduced Findings

Fewer audit issues across environments

Stronger, repeatable governance with scalable multi-tenant oversight and minimal operational overhead.

Ideal For

Federal & State programs, community cloud providers, defense contractors, healthcare consortiums, financial institutions, large multi-entity platforms

Pricing Model

Modular licensing based on number of tenants, regulatory template packs, sovereignty controls, and federated governance features
