

# C1 SmartThreatDetection

## Continuous Threat & Compliance Monitoring

SmartThreatDetection unifies threat intel, vulnerabilities, assets, and IRM context inside ServiceNow to prioritize real business and compliance impact. It automates POA&Ms, accelerates ConMon cycles, and strengthens SecOps-GRC alignment.

### Threat Intelligence

KEV/CISA intel ingestion with threat + vuln + asset correlation for compliance-aware prioritization across FedRAMP, StateRAMP, and CMMC frameworks.

### Automated Workflows

Automated POA&M creation, tracking, and ConMon reporting with SIR incident enrichment using business context and threat-to-control traceability.

### Risk Prioritization

Risk-based threat detection identifies impacts on critical services and regulated systems, linking active threats to controls and risks for contextual response.

### Key Outcomes

- Focus on highest-impact threats
- Faster POA&M and ConMon cycles
- Fewer audit findings
- Shorter incident response times

### Ideal For

CISOs, SOC leaders, SecOps, IRM/GRC teams, and FedRAMP/StateRAMP program owners seeking unified threat and compliance monitoring.

**Pricing:** Based on core engine, POA&M automation, threat intel integrations, and ConMon/AI packs.
