

# C1 SmartROI Calculator

## Quantify the Impact of Risk & Compliance Programs

Model time savings, FTE efficiencies, audit reduction, and risk avoidance while generating executive-ready ROI reports and tracking real value through ServiceNow-native data.

### THE IMPACT

#### Faster

Budget Approvals

#### Defensible

ROI for GRC Investments

#### Reduced

Audit & Compliance Costs

#### ■ Key Use Cases

- Pre-project justification for IRM, SecOps, and automation
- Compliance cost modeling for SOX, FedRAMP, HIPAA, CMMC
- Tool and vendor comparison with projected ROI analysis
- Post-implementation value validation vs. projections
- Board-ready financial reporting (ROI, NPV, IRR, payback)

#### ■ Ideal For

- CFOs, CISOs, CIOs, and CROs
- IRM leads and compliance directors
- Audit leadership teams
- Value engineering teams
- Anyone seeking standardized financial modeling

#### ROI Modeling

Scenario-based benefit modeling with automation calculators, FTE cost reduction, and audit efficiency tracking.

#### Executive Reporting

Generate ROI, NPV, IRR, and payback reports for CFO/CIO/CISO budget submissions and board presentations.

#### Value Tracking

Post-implementation dashboards validate realized benefits versus projections using native ServiceNow data ingestion.

### KEY USE CASES

- Pre-project justification with quantified ROI for IRM, SecOps, and automation investments
- Compliance cost modeling across SOX, FedRAMP, HIPAA, and CMMC programs
- Tool and vendor comparison with projected ROI analysis for informed procurement decisions
- Post-implementation value tracking validating realized benefits against original projections

### Why C1Secure

#### Defensible Numbers

Standardized financial modeling produces clear, defensible ROI that CFOs and boards trust.

#### ServiceNow-Native Data

Value tracking pulls real data from your ServiceNow environment for accurate post-implementation insight.

#### Full Lifecycle Coverage

From pre-project justification to post-implementation validation, SmartROI covers it all.

Clear, defensible ROI for every GRC and security investment.

Modular licensing: calculator core, accelerator packs, executive reporting, value dashboards.
