C1Secure

C1 SmartOnboard
Automated, Compliance-Aligned
Access Onboarding

SmartOnboard automates access onboarding for secure and regulated environments. It validates prerequisites, routes approvals, and provides end-to-end audit trails.

THE IMPACT

50-80%
Faster Onboarding

100%
Audit Traceability

Zero
Email-Based Routing

■ Core Capabilities

- Self-service access request portal
- Automated adjudication and approvals
- Document validation (training, NDA, background, eligibility)
- Multi-department workflow support
- Real-time dashboards, tracking, and complete audit logs

■ Key Value Points

- 50-80% faster onboarding from weeks to days
- Enforces compliance prerequisites automatically
- Eliminates email-based routing and manual steps
- Full audit traceability for every onboarding action
- Standardizes onboarding across all environments

Self-Service Portal

Users request access through a guided portal that validates prerequisites and routes approvals automatically.

Automated Adjudication

Document validation for training, NDA, background checks, and eligibility with multi-department workflow support.

Complete Audit Trail

Every step is logged with full traceability - from request to approval to role/group assignment.

KEY USE CASES

→ FedRAMP adjudicated access onboarding with automated prerequisite validation
→ Vendor and contractor onboarding with document checks and multi-department approvals
→ High-trust corporate system access with role-based assignment automation
→ Cross-department approval orchestration replacing email chains with governed workflows

Why C1Secure

Compliance-First

Every onboarding step enforces compliance prerequisites before granting access.

Built for ServiceNow

Native integration means onboarding workflows live inside your existing ServiceNow environment.

Weeks to Days

Automated adjudication and routing cuts onboarding timelines from weeks to days.

Fast, compliant, fully traceable onboarding.
Automated access onboarding for any secure or regulated environment.
