

# C1 Security Posture Control SmartStart

Rapid deployment of ServiceNow CSPM for multi-cloud security—continuously monitoring cloud configurations across AWS/Azure, detecting misconfigurations, mapping compliance gaps, and routing remediation with SmartAI-enhanced governance.

## Multi-Cloud Coverage

Continuous scanning across AWS, Azure with automated misconfiguration detection and CIS/NIST benchmark alignment out of the box.

## SmartAI Intelligence

AI-powered remediation guidance, compliance insights, and automated workflows with SLA tracking for DevOps/CloudOps teams.

## Unified Governance

Integrated with IRM, SecOps, SmartDACM—mapping misconfigurations to controls, risks, POA&Ms with CMDB enrichment and normalized asset context.

## Core Capabilities

- Multi-cloud resource discovery + benchmark checks
- Automated remediation workflows with SLAs
- Exception + risk acceptance governance
- Cloud account onboarding + access control
- Posture dashboards + compliance trend tracking

## Primary Use Cases

- Prevent cloud misconfigurations before exploitation
- Automate CIS/NIST benchmark scanning
- Support Cloud ATO + continuous monitoring
- Link misconfigurations to policies and controls
- Route fixes to teams with SLA enforcement

# 70%

## Faster Remediation

Reduction in cloud misconfiguration resolution time

# 60%

## Time Savings

Less effort for compliance evidence collection

# 2x

## ATO Acceleration

Faster continuous monitoring readiness

**Positioning:** Modern ServiceNow-aligned CSPM foundation bringing continuous cloud monitoring, automated remediation, SmartAI intelligence, and IRM/SecOps integration for scalable governance.

**Typical pricing:** \$XX,XXX-\$YY,YYY based on cloud account volume, resource count, integrations, and SmartAI enablement tier.
