C1 SmartAdvisory

From Complexity to Compliance Clarity

SmartAdvisory is C1Secure's modular compliance and governance advisory service that helps organizations navigate complex regulatory, architectural, and contractual requirements. We analyze environments, define boundaries, harmonize frameworks, and create a clear, defensible plan for compliance readiness and scale.

Gap Analysis

Compliance gap analysis, readiness planning, and framework mapping across FedRAMP, CMMC, NIST, ISO, SOC 2, and HIPAA.

Boundary Design

Security boundary design, scoping, and cloud architecture rationalization for inheritance and scalability.

Documentation

SSP authoring, contractual alignment, and ATO assessment advisory for 3PAO/C3PAO readiness.

Use Cases

- Preparing for higher compliance levels (FedRAMP IL4→IL5, CMMC upgrades)
- Authorization & assessment readiness with clear SSPs
- Multi-framework alignment to reduce duplicate effort
- Boundary & shared services design in complex architectures
- Pre-platform advisory to ensure governance before tooling

Key Outcomes

- Clear scoping and boundary decisions
- Harmonized, defensible control models
- Reduced rework and compliance cost
- Faster path to ATO or certification
- Alignment across security, engineering, compliance, and legal stakeholders

1 **CISOs & Security Leaders**
Strategic compliance planning and risk management

2 **Compliance & GRC Executives**
Framework harmonization and audit readiness

3 **Cloud/Architecture Leaders**
Boundary design and inheritance models

4 **Federal/GovCon Programs**
ATO acceleration and regulatory navigation

Pricing: Engagements are modular and scoped based on environment complexity, timelines, and regulatory objectives.
