C1 SmartConMon
Continuous Compliance Monitoring

SmartConMon automates continuous monitoring across any compliance framework. It collects evidence, validates controls, detects drift, and triggers remediation—turning point-in-time reviews into always-on compliance. Integrated with SmartDACM and IRM, it reduces manual monitoring cycles and delivers real-time visibility into control health.

Automated Evidence
Collection & validation with AI-powered drift detection and anomaly identification

Real-Time Visibility
Live dashboards, alerts, control scoring & readiness indicators

Integrated Workflows
Remediation via SmartRequest, unified mapping through SmartDACM

Key Use Cases

- **Replace Manual Control Checks** — automate evidence and scoring
- **Drift Detection** — AI flags weakening controls early
- **Continuous Audit Readiness** — evidence always current and mapped
- **Cross-Framework Monitoring** — ISO, SOC 2, PCI, NIST, CMMC, HIPAA
- **Risk Correlation** — feed monitoring results into issues/POA&M

Business Outcomes

60-90%

Time Reduction
Less manual monitoring hours

Weeks→Hours

Faster Cycles
Accelerated monitoring

Fewer audit findings, stronger data-driven compliance posture, and real-time readiness for any audit.

Ideal For
CISOs & Compliance Leaders, GRC/IRM teams, Audit programs, Defense, public sector, and regulated enterprises

Pricing
Core SmartConMon engine with optional AI and rule-library add-ons
