

C1 SmartDACM for Defense

Unified Defense Compliance Automation

C1 SmartDACM for Defense unifies CMMC, FedRAMP, DFARS, NIST 800-171, and NIST 800-53 compliance into a single ServiceNow-based automation suite. It harmonizes overlapping frameworks, automates SSP and POA&M work, centralizes evidence, and delivers AI-powered readiness insights including SPRS scoring. Defense contractors and agencies gain faster certification timelines, reduced manual rework, and consistently audit-ready compliance operations.

Core Capabilities

- Unified control harmonization across all defense frameworks
- AI-assisted SSP review with automated SPRS scoring
- Smart POA&M Generator for FedRAMP and CMMC outputs
- Evidence reuse across all defense frameworks
- Continuous monitoring and vulnerability integration
- Real-time dashboards for SPRS, POA&M burndown, and risk posture

Key Use Cases

- Unified CMMC + FedRAMP compliance with single evidence set
- Automated SPRS scoring with AI evaluation
- FedRAMP ConMon and ATO automation
- Centralized evidence repository for all defense programs
- Defense audit prep for DIBCAC and 3PAO
- Executive readiness oversight with comprehensive dashboards

Outcomes

- Faster CMMC and FedRAMP readiness
- Reduced audit preparation effort
- Stronger SPRS posture
- Less duplicate evidence work
- Streamlined ATO and ConMon cycles
- Lower overall compliance cost

Ideal For

- Defense contractors (DIB)
- Federal agencies and CSPs
- CMMC Program Managers
- FedRAMP and DFARS teams
- Compliance, IRM, and audit leadership

 **Pricing:** Modular defense compliance suite; pricing varies by systems, frameworks, and selected add-ons.
