C1 SmartDACM for GovRAMP

Automate State Cloud Assurance

SmartDACM for GovRAMP automates GovRAMP, TX-RAMP, AZRAMP, and StateRAMP requirements in a single ServiceNow-based workflow. It generates SSPs, POA&Ms, and ConMon packages, supports OSCAL exports, and reuses evidence across programs—cutting certification timelines and eliminating spreadsheet-driven work.

Core Capabilities

- Unified engine for all state frameworks
- Automated SSP + POA&M generation
- ConMon automation (SmartConMon 20x)
- AI-assisted mapping and scoring
- Cross-state evidence reuse
- Multi-agency governance

Key Use Cases

- GovRAMP artifact automation
- TX/AZ-RAMP fast-track certification
- Shared cloud governance
- Vendor multi-state compliance
- 60–80% ConMon workload reduction
- Single evidence upload across programs

Business Outcomes

- Faster state certification cycles
- Major reduction in manual work
- Lower recurring ConMon effort
- Consistent statewide compliance
- Reduced costs for agencies + vendors

Ideal For

- State agencies + CIO offices
- SLED cloud vendors
- Shared-service / community cloud environments
- Compliance, Risk, and Audit teams

Pricing Note

Modular suite with pricing based on number of agencies, vendors, and frameworks supported.
