

C1 SmartOps Guardian

Fully Managed IRM, SecOps & Compliance Operations on Your Instance

SmartOps Guardian is C1Secure's managed operations layer for organizations that own their ServiceNow instance but need full IRM, SecOps, compliance, and ATO automation delivered as a service. C1Secure runs SmartDACM and the full SmartCompliance Suite directly inside your environment—providing continuous monitoring, automated evidence, SmartAI-driven SSP/POA&M generation, and 24x7 operational execution. You retain platform ownership and data sovereignty; C1Secure delivers the outcomes.

Managed Operations

Full IRM, SecOps, and compliance operations with SmartDACM and SmartEvidenceEngine deployment

SmartAI Automation

Automated SSPs, POA&Ms, and ATO package generation with AI orchestration

Continuous Monitoring

24x7 operations with unified workflows across Risk, Policy, Controls, VR, SIR, BCM, and Vendor Risk

Key Use Cases

- No internal IRM/SecOps team
- Slow, manual ATO cycles
- Inconsistent audit readiness
- Siloed risk & security teams
- In-instance SmartDACM deployment

Delivered Outcomes

- End-to-end automation as a service
- Real-time evidence posture
- 70–80% faster ATO cycles
- Reduced compliance workload
- Unified operational model

Ideal For

CISOs, CIOs, CROs, IRM/SecOps leaders, federal contractors, and regulated enterprises wanting SmartDACM + SmartAI on their own instance

Pricing

Varies by instance size, framework scope, operations coverage, and SmartAI depth
