

C1 SmartStart for Advanced Risk Management

Rapid deployment of ServiceNow Risk & Advanced Risk

Unified Taxonomy

Enterprise-wide risk taxonomy with domain-aligned KRIs and standardized scoring models

Automated Intelligence

Automated routing, scoring, and escalation with real-time triggers from Audit, VRM, SecOps, ConMon, and Policy

Cross-Module Correlation

Connected risk intelligence linking Controls, Issues, Vendors, and Assets for deeper context

Core Capabilities

- Standardized risk register with lifecycle workflows
- Qualitative and quantitative (FAIR-ready) scoring
- Inherent, residual, and target risk models
- Scenario modeling and trending analytics
- Executive dashboards with heat maps
- Integrated remediation and mitigation planning

Primary Use Cases

- Build unified enterprise risk register
- Automate scoring via KRIs
- Enable FAIR-based quantitative modeling
- Link risks to audit findings and issues
- Deliver executive reporting and insights

50-70%

Assessment Reduction

Decrease in manual assessment workload

2-3×

Faster Identification

Accelerated risk identification via automated triggers

40-60%

Remediation Alignment

Improvement in remediation planning and execution

The SmartStart Advantage

Move from static risk registers to connected, actionable risk intelligence. SmartStart delivers a modern, ServiceNow-aligned ERM program combining structured taxonomies, automated scoring, cross-module correlation, and executive-ready insights. Organizations gain better audit outcomes through linked risks and controls, plus financially meaningful decisions via quantitative scoring models.

Pricing

Typical engagement:
\$XX,XXX-\$YY,YYY
based on modules, risk volume, and quantitative modeling requirements
