C1 SmartAI for DACM
AI-Powered Controls
& Attestations

SmartAI for DACM brings governed AI to control authoring, attestation scoring, evidence quality checks, and cross-framework interpretation within the SmartDACM platform.

THE IMPACT

Major
Review Workload Reduction

Faster
ATO & SSP/POA&M Cycles

Fewer
Audit Findings

■ Key Outcomes

- Major reduction in manual review workload
- Improved quality of controls and attestations
- Faster ATO cycles and SSP/POA&M preparation
- Fewer audit findings through better documentation
- Consistent interpretation across all frameworks

■ Ideal For

- FedRAMP and CMMC compliance teams
- Cloud service providers and defense contractors
- Federal agencies and third-party assessors
- IRM and internal audit teams
- Organizations seeking AI-enhanced compliance workflows

AI-Generated Controls

Automatically draft control language from citations, eliminating manual authoring effort and ensuring consistency.

Attestation Scoring

Instant scoring with automated gap detection and risk flagging for faster, more accurate reviews.

Evidence Quality Checks

Automated validation ensures documentation meets compliance standards across FedRAMP, CMMC, NIST, ISO, and more.

KEY USE CASES

→ AI-generated control language from framework citations across NIST, ISO, CMMC, and FedRAMP
→ Automated attestation scoring with gap detection and risk flagging before submission
→ Evidence quality validation ensuring documentation meets compliance standards
→ Cross-framework interpretation maintaining consistency across multiple standards

Why C1Secure

SmartDACM Native

Built as an add-on to SmartDACM for seamless integration with existing authorization workflows.

Multi-Framework AI

Consistent interpretation across FedRAMP, CMMC, NIST, ISO, SOC 2, and PCI standards.

Human-in-the-Loop

AI drafts and scores. Humans review and approve. Full audit trail of every AI action.

Governed AI for controls, attestations, and evidence quality.

Add-on to SmartDACM. Pricing based on AI usage volume and framework scope.
