## C1 SmartBuild Studio
# From XML to Actionable
# *Change Intelligence*

SmartBuild Studio turns raw ServiceNow update sets into fully visualized, auditable change intelligence - saving 8-12 hours per sprint and reducing rework by up to 60%.

### THE IMPACT

| **8-12 hrs** | **40%** | **60%** |
|:---:|:---:|:---:|
| Saved Per Sprint | Faster Onboarding | Debugging Reduction |

### ■ Core Capabilities

- Drag-and-drop XML ingestion (single or batch)
- Parses 14+ component types (BRs, Flows, etc.)
- Dependency and relationship mapping
- Central Component Registry for reuse
- Auto-generated documentation (KB-ready)

### ■ Key Value Points

- X-ray visibility into every component and dependency
- Automated parsing and documentation generation
- Faster onboarding and debugging for new developers
- Stronger governance and audit readiness
- AI-ready structured metadata for analysis

### Visual Parsing

Upload XML and instantly see parsed components, relationships, and documentation with full dependency mapping.

### Change Intelligence

Dashboards for change risk, trends, and complexity give teams actionable insight before deployment.

### Audit Governance

Auto-generated documentation supports ITGC compliance and architecture hygiene across every update set.

### KEY USE CASES

→ Pre-deployment review and risk assessment of ServiceNow update sets
→ Developer onboarding with instant visibility into codebase structure and dependencies
→ Faster debugging and triage through visual component and relationship mapping
→ Audit and ITGC documentation with auto-generated, KB-ready artifacts

## Why C1Secure

### No More Manual XML

Replaces hours of manual XML review with instant automated parsing and visualization.

### Platform Integration

Integrates with SmartBuild Agile and Fusion for end-to-end ServiceNow delivery governance.

### Developer-First

Built for ServiceNow developers who need speed, clarity, and confidence in every deployment.

**Visibility, documentation, and governance for ServiceNow teams.**

*SmartBuild Studio replaces manual XML review with automated change intelligence.*

**Ready to accelerate?**
