

C1 SmartConMon 20x

The Automation Engine for FedRAMP Continuous Reporting

SmartConMon 20x automates FedRAMP ConMon reporting by ingesting POA&M/FIIW artifacts, generating 20x-aligned Key Security Metrics, and exposing 24 months of immutable data.

THE IMPACT

60-80%

Reporting Labor Reduction

30-50%

3PAO Reconciliation Savings

50-70%

Faster Pre-Meeting Prep

■ Core Capabilities

- POA&M / FIIW ingestion and validation
- KSM engine (vulns, KEV, incidents, changes)
- Multi-party dashboards and portal access
- 24-month immutable reporting history
- FRMR-style machine-readable exports

■ Key Value Points

- Automates monthly ConMon reporting end-to-end
- Generates KSM dashboards and JSON outputs
- Shared CSP / agency / 3PAO portal views
- Transparent scan coverage without VR license
- Tool-agnostic with optional ServiceNow integration

Metrics Automation

Generates 20x-aligned Key Security Metrics automatically from ingested POA&M and FIIW artifacts.

Multi-Party Portal

Shared dashboards for CSPs, agencies, and 3PAOs with role-based access and transparent scan coverage.

Immutable History

24 months of auditable, machine-readable reporting data with FRMR-style exports for full traceability.

KEY USE CASES

- CSP ConMon reporting automation replacing spreadsheets with machine-readable outputs
- Agency oversight and pre-review with shared multi-party dashboards and KSM visibility
- 3PAO validation and sampling with immutable 24-month reporting history
- FedRAMP 20x and FRMR readiness with multi-cloud data normalization

Why C1Secure

FedRAMP 20x Ready

Purpose-built for the FedRAMP 20x framework with native KSM generation and FRMR exports.

Tool-Agnostic

No VR license required. Works with any scanning tools and optionally integrates with ServiceNow.

Multi-Party Trust

Shared portal gives CSPs, agencies, and 3PAOs a single source of truth for ConMon reporting.

Automated, auditable, transparent ConMon reporting.

Standardized metrics pipeline for CSPs, agencies, and 3PAOs.
