

# C1 SmartConMon

## Continuous Compliance Monitoring

SmartConMon automates continuous monitoring across any compliance framework - collecting evidence, validating controls, detecting drift, and turning point-in-time reviews into always-on compliance.

### THE IMPACT

## 60-90%

Less Manual Monitoring

## Weeks to Hrs

Faster Monitoring Cycles

## Fewer

Audit Findings

### ■ Core Capabilities

- Automated evidence collection and validation
- AI-powered drift detection and anomaly identification
- Live dashboards, alerts, and control scoring
- Remediation via SmartRequest integration
- Unified mapping through SmartDACM

### ■ Key Use Cases

- Replace manual control checks with automated evidence and scoring
- Drift detection with AI flagging weakening controls early
- Continuous audit readiness with evidence always current and mapped
- Cross-framework monitoring (ISO, SOC 2, PCI, NIST, CMMC, HIPAA)
- Risk correlation feeding monitoring results into issues and POA&Ms

### Automated Evidence

Collection and validation with AI-powered drift detection and anomaly identification across all frameworks.

### Real-Time Visibility

Live dashboards, alerts, control scoring, and readiness indicators for always-on compliance posture monitoring.

### Integrated Workflows

Remediation via SmartRequest and unified control mapping through SmartDACM for end-to-end governance.

### KEY USE CASES

- Replacing manual control checks with automated evidence collection and scoring
- AI-powered drift detection flagging weakening controls before they become findings
- Continuous audit readiness ensuring evidence is always current, mapped, and accessible
- Cross-framework monitoring across ISO, SOC 2, PCI, NIST, CMMC, and HIPAA simultaneously

### Why C1Secure

### Always-On Compliance

Turn point-in-time reviews into continuous monitoring with real-time visibility into control health.

### AI-Powered Detection

Drift detection and anomaly identification catch weakening controls before auditors do.

### SmartSuite Integration

Native integration with SmartDACM and SmartRequest for unified evidence-to-remediation workflows.

**From point-in-time reviews to always-on compliance.**

*Core SmartConMon engine with optional AI and rule-library add-ons.*

**Ready to accelerate?**
