

C1 SmartDACM for GovRAMP

State Cloud Assurance Automation on ServiceNow

SmartDACM for GovRAMP automates GovRAMP, TX-RAMP, AZRAMP, and StateRAMP requirements in a single workflow with OSCAL exports, evidence reuse, and ConMon automation.

THE IMPACT

60-80%

ConMon Workload Reduction

Faster

State Certification Cycles

Lower

Recurring Compliance Cost

■ Core Capabilities

- Unified engine for all state cloud frameworks
- Automated SSP and POA&M generation
- ConMon automation via SmartConMon 20x
- AI-assisted mapping and scoring
- Cross-state evidence reuse and multi-agency governance

■ Business Outcomes

- Faster state certification cycles across programs
- Major reduction in manual compliance work
- Lower recurring ConMon effort for agencies and vendors
- Consistent statewide compliance posture
- Reduced costs for both agencies and cloud vendors

State Framework Engine

Unified engine supporting GovRAMP, TX-RAMP, AZRAMP, and StateRAMP in a single ServiceNow-based automation workflow.

ConMon Automation

SmartConMon 20x integration for continuous monitoring with 60-80% workload reduction and automated reporting.

Cross-State Evidence

Single evidence upload reused across multiple state programs eliminating duplicate work for vendors and agencies.

KEY USE CASES

- GovRAMP artifact automation with SSP, POA&M, and ConMon package generation
- TX-RAMP and AZ-RAMP fast-track certification with automated compliance workflows
- Shared cloud governance for community cloud and multi-agency environments
- Vendor multi-state compliance with single evidence upload across programs

Why C1Secure

All State Frameworks

GovRAMP, TX-RAMP, AZRAMP, and StateRAMP unified in one engine with OSCAL-native exports.

Evidence Once, Use Many

Single upload reused across every state program eliminating vendor and agency duplicate work.

Agency + Vendor Ready

Supports both state agencies and SLED cloud vendors with shared-service governance models.

Automated state cloud assurance across all GovRAMP frameworks.

Modular suite; pricing based on agencies, vendors, and frameworks supported.
