

C1 SmartDACM

Digital Authorization Compliance Manager

SmartDACM modernizes the ATO process by integrating NIST OSCAL directly into ServiceNow IRM - replacing static documents with a machine-readable, fully traceable authorization system.

THE IMPACT

40-60%

Faster SSP Development

50-70%

Faster Evidence Collection

Months to Weeks

ATO Timeline Reduction

Core Capabilities

- OSCAL ingestion, export, and round-trip authoring
- Automated SSP population and control mapping
- Evidence collection and validation workflows
- POA&M tasking, updates, and remediation tracking
- Assessment, reviewer, and clarification workflows

Key Value Points

- OSCAL-native authorization management
- Automated SSP, control, and evidence workflows
- Reduced ATO timelines from months to weeks
- Continuous authorization via reusable models
- Unified compliance system of record in ServiceNow

OSCAL-Native Engine

Full OSCAL ingestion, export, and round-trip authoring for machine-readable authorization packages and compliance artifacts.

ATO Automation

Automated SSP population, control implementation mapping, and evidence collection with built-in validation workflows.

Continuous Authorization

ConMon data calls, readiness dashboards, and inherited control management enable continuous compliance at scale.

KEY USE CASES

- Full ATO package development (SSP, SAP, SAR, POA&M) with OSCAL-native workflows
- Rapid SSP updates from existing system documentation with automated control mapping
- OSCAL-driven monthly and quarterly ConMon reporting with readiness dashboards
- Evidence-driven assessment cycles with fewer assessor clarifications

Why C1Secure

OSCAL Pioneer

First ServiceNow-native OSCAL implementation for machine-readable authorization management.

End-to-End ATO

From SSP authoring to ConMon reporting, SmartDACM covers the full authorization lifecycle.

Multi-Framework

Supports FedRAMP, StateRAMP, DoD RMF, and NIST 800-53 with inherited control management.

OSCAL-native authorization inside ServiceNow.

Accelerating ATO delivery and enabling continuous compliance for federal environments.
