

## C1 SmartForms

# Dynamic, Schema-Driven Forms for ServiceNow

SmartForms automatically adapts fields, validation, and visibility based on SmartCore metadata, user role, and object type with zero-script configuration and framework-aligned validation.

### THE IMPACT

#### Faster

Guided Data Entry

#### Consistent

UX Across SmartApps

#### Reduced

Config & Maintenance

#### ■ Key Use Cases

- Control attestations with auto-exposed evidence fields
- FedRAMP POA&M with dynamic required data validation
- Risk assessments showing scoring fields contextually
- Audit evidence enforcing metadata and correct types
- Entity onboarding adjusted by tier and regulatory exposure

#### ■ Business Outcomes

- Faster, guided data entry with fewer errors
- Consistent UX across all C1 SmartApps
- Reduced configuration and maintenance effort
- Audit-ready data quality and lifecycle enforcement
- Accelerated IRM, SecOps, and SmartDACP deployments

#### Schema-Driven

Forms automatically adapt fields, validation, and visibility based on SmartCore metadata, role, and object type.

#### Framework-Aligned

Embedded validation for FedRAMP, CMMC, SOX, PCI, and ISO ensures compliance-ready data entry at every step.

#### Zero-Script Config

Reusable across all C1 SmartApps with unified UX powered by metadata-driven automation without custom scripting.

### KEY USE CASES

- Dynamic form rendering for control attestations, POA&Ms, risk assessments, and evidence
- Framework-aligned validation ensuring FedRAMP, CMMC, SOX, PCI, and ISO compliance
- Entity onboarding with fields adjusted by tier, geography, and regulatory exposure
- Issue remediation displaying RCA and remediation fields only when contextually applicable

### Why C1Secure

#### Metadata-Driven

No custom scripting required. Forms adapt automatically based on SmartCore metadata.

#### Universal SmartApp UX

Consistent experience across every C1 SmartApp with unified form behavior and validation.

#### Compliance Built In

FedRAMP, CMMC, SOX, PCI, and ISO validation embedded in every form interaction.

Dynamic, compliance-ready forms powered by SmartCore metadata.

Included as part of applicable C1 SmartProducts (SmartCore component).
