

C1 SmartOps DevFlex

Managed ServiceNow Dev & Release Acceleration

SmartOps DevFlex delivers a fully managed ServiceNow development and release capability powered by SmartBuild Studio. C1Secure becomes your on-demand DevOps engine.

THE IMPACT

Faster

Delivery & Higher Velocity

Reduced

Dev Cost & Staffing Burden

Lower

Release-Related Incidents

■ Key Use Cases

- No internal development capacity available
- Large backlogs and slow delivery cycles
- Rapid workflow and App Engine builds needed
- High release risk and dependency issues
- Technical debt remediation across the platform

■ Measurable Outcomes

- Faster delivery and higher development velocity
- Reduced dev cost and staffing burden
- Lower release-related incidents
- Clear change visibility across releases
- Accelerated innovation and roadmap execution

Managed Development

Fully managed ServiceNow bench with admins, devs, and architects delivering workflows, catalog items, and App Engine apps.

SmartBuild Studio

Automated update-set parsing, dependency detection, and audit-ready release artifacts with SmartAI acceleration.

Rapid Delivery

Configurable sprints or continuous agile cycles with transparent reporting on velocity, impact, and roadmap execution.

KEY USE CASES

- Organizations without internal ServiceNow development capacity needing instant bench strength
- Platform owners with growing backlogs seeking predictable, high-velocity delivery
- Teams requiring rapid workflow and App Engine builds with SmartAI-powered acceleration
- CIOs and IT leaders wanting low-risk releases with automated dependency mapping

Why C1Secure

On-Demand DevOps

No hiring needed. C1Secure delivers a fully managed ServiceNow dev bench ready to execute.

SmartBuild Powered

Automated update-set intelligence, dependency mapping, and audit-ready release artifacts.

Predictable Delivery

Transparent reporting on velocity, impact, and roadmap execution with configurable sprint cycles.

Fully managed ServiceNow development without the hiring.

Pricing based on monthly capacity, modules, SmartBuild Studio tier, and governance needs.
