

C1 SmartOps Guardian

Managed IRM, SecOps & Compliance on Your Instance

SmartOps Guardian delivers full IRM, SecOps, compliance, and ATO automation as a managed service on your ServiceNow instance. You retain platform ownership; C1Secure delivers outcomes.

THE IMPACT

70-80%

Faster ATO Cycles

End-to-End

Automation as a Service

24x7

Operational Execution

■ Key Use Cases

- No internal IRM or SecOps team available
- Slow, manual ATO cycles needing acceleration
- Inconsistent audit readiness across programs
- Siloed risk and security teams lacking integration
- In-instance SmartDACM deployment and operations

■ Delivered Outcomes

- End-to-end compliance automation as a service
- Real-time evidence posture across all frameworks
- 70-80% faster ATO cycles with SmartAI
- Reduced compliance workload for internal teams
- Unified operational model across Risk, Policy, and SecOps

Managed Operations

Full IRM, SecOps, and compliance operations with SmartDACM and SmartEvidenceEngine deployed on your instance.

SmartAI Automation

Automated SSPs, POA&Ms, and ATO package generation with AI orchestration for faster authorization cycles.

Continuous Monitoring

24x7 operations with unified workflows across Risk, Policy, Controls, VR, SIR, BCM, and Vendor Risk.

KEY USE CASES

- Organizations needing managed IRM and SecOps without building internal teams
- Accelerating ATO cycles with SmartDACM and SmartAI deployed on your instance
- Achieving continuous audit readiness with 24x7 evidence and monitoring operations
- Unifying siloed risk and security teams under a single managed operational model

Why C1Secure

Your Instance, Our Ops

You retain platform ownership and data sovereignty. C1Secure delivers the compliance outcomes.

Full SmartSuite Deployed

SmartDACM, SmartCompliance Suite, and SmartAI running on your instance from day one.

24x7 Execution

Continuous operations across Risk, Policy, Controls, VR, SIR, BCM, and Vendor Risk modules.

Managed IRM, SecOps, and ATO automation on your ServiceNow instance.

Pricing varies by instance size, framework scope, operations coverage, and SmartAI depth.
