

C1 SmartOps Sentinel

Turnkey IRM, SecOps & ATO Compliance Cloud

SmartOps Sentinel is a fully managed, C1Secure-owned ServiceNow environment delivering IRM, SecOps, SmartDACM, and SmartAI as an operational outcome. No platform to deploy or maintain.

THE IMPACT

70-80%

Faster ATO Cycles

Day One

Compliance Cloud Ready

Automated

Evidence, SSPs & POA&Ms

■ Use Cases

- No ServiceNow platform or licenses available
- FedRAMP/StateRAMP/CMMC programs requiring automation
- Low SecOps maturity needing managed workflows
- Manual spreadsheets and governance gaps
- Continuous monitoring without a dedicated team

■ Key Outcomes

- Complete compliance cloud ready on day one
- 70-80% faster ATO cycles with full automation
- Automated evidence, SSPs, and POA&Ms
- Enhanced SecOps efficiency and risk visibility
- Continuous audit readiness across all programs

Turnkey Environment

C1Secure-owned ServiceNow with pre-configured IRM, SecOps, BCM, Vendor Risk, and Risk Management ready on day one.

SmartDACM Complete

Automated SSP, POA&M, inheritance, mapping, and SmartEvidenceEngine for real-time evidence automation.

SmartAI Agents

AI-powered ATO packages, evidence summaries, monitoring, and SmartCitationMapper for guided workflows.

KEY USE CASES

- Organizations without ServiceNow licenses or platform staff needing instant compliance capability
- FedRAMP, StateRAMP, and CMMC programs requiring automated SSPs, POA&Ms, and evidence
- Teams with low SecOps maturity needing fully managed security and risk workflows
- Replacing manual spreadsheets and governance gaps with an enterprise compliance cloud

Why C1Secure

Zero Platform Overhead

No licenses, no deployment, no maintenance. C1Secure owns and operates the entire environment.

Full Stack Compliance

IRM, SecOps, SmartDACM, SmartAI, and managed operations all included from day one.

Outcome-Based Delivery

You get compliance outcomes, not a platform to manage. Focus on mission, not tooling.

Enterprise compliance cloud with zero platform overhead.

Pricing based on boundary size, frameworks, operations scope, and SmartAI depth.
