C1 SmartStart for Advanced Risk Management
Connected Enterprise Risk Intelligence on ServiceNow

Rapid deployment of ServiceNow Risk and Advanced Risk with structured taxonomies, automated scoring, cross-module correlation, and executive-ready insights for actionable risk intelligence.

THE IMPACT

50-70%	**2-3x**	**40-60%**
Assessment Reduction	Faster Identification	Remediation Alignment

◻ Core Capabilities

- Standardized risk register with lifecycle workflows
- Qualitative and quantitative (FAIR-ready) scoring
- Inherent, residual, and target risk models
- Scenario modeling and trending analytics
- Executive dashboards with heat maps

◻ Primary Use Cases

- Build a unified enterprise risk register
- Automate risk scoring via KRIs and triggers
- Enable FAIR-based quantitative modeling
- Link risks to audit findings and issues
- Deliver executive reporting and insights

Unified Taxonomy

Enterprise-wide risk taxonomy with domain-aligned KRIs and standardized scoring models across the organization.

Automated Intelligence

Automated routing, scoring, and escalation with real-time triggers from Audit, VRM, SecOps, ConMon, and Policy.

Cross-Module Correlation

Connected risk intelligence linking Controls, Issues, Vendors, and Assets for deeper context and better decisions.

KEY USE CASES

→ Moving from static risk registers to connected, actionable enterprise risk intelligence
→ Automating risk scoring with KRIs and real-time triggers from Audit, VRM, and SecOps
→ Enabling FAIR-based quantitative modeling for financially meaningful risk decisions
→ Linking risks to audit findings, issues, and controls for complete traceability

Why C1Secure

◆ Beyond Static Registers

Move to connected, actionable risk intelligence with automated scoring and cross-module data.

FAIR-Ready Scoring

Qualitative and quantitative models including inherent, residual, and target risk with scenario modeling.

Executive Insights

Heat maps, trending analytics, and dashboards that give leaders actionable risk visibility.

Connected enterprise risk intelligence with automated scoring.
Pricing based on modules, risk volume, and quantitative modeling requirements.
