C1 SmartStart for Business Continuity Management
Structured Continuity Planning & Crisis Response

Rapid deployment of ServiceNow BCM automating BIA workflows, continuity planning, crisis activation, and testing for audit-ready programs aligned to ISO 22301, FFIEC, and NIST 800-34.

THE IMPACT

50-70%
Faster BIAs

60%
Plan Development Speed

70-90%
Testing Efficiency

■ Core Capabilities

- BIA configuration with RTO/RPO targets
- Role-based responsibilities and escalations
- Activation workflows tied to incidents and risks
- Automated evidence capture and reporting
- Integration with CMDB, Incident, and Risk

■ Primary Use Cases

- Replace static documents with structured plans
- Conduct business impact analyses at scale
- Activate continuity plans during disruptions
- Test plans with traceable, evidence-captured outcomes
- Provide leadership with resilience insight

Automated BIA
Critical process mapping with consistent scoring, RTO/RPO targets, and structured impact assessments.

Crisis Activation
Faster coordination and notifications with activation workflows tied directly to incidents and risks.

Testing Workflows
Evidence-captured tabletop simulations with traceable outcomes for audit-ready continuity validation.

KEY USE CASES

→ Automating business impact analyses at scale with consistent scoring and RTO/RPO targets
→ Replacing static Word documents and spreadsheets with structured, testable continuity plans
→ Crisis activation with automated coordination, notifications, and incident-linked workflows
→ Tabletop testing with evidence capture and traceable outcomes for audit readiness

Why C1Secure

◆ Compliance-Aligned
Audit outcomes aligned to ISO 22301, FFIEC, and NIST 800-34 from day one.

Structured Activation
Reduce downtime with activation workflows tied to incidents, risks, and CMDB-linked assets.

Testable & Traceable
Every plan test produces evidence-captured, traceable outcomes for auditors and leadership.

Structured, testable continuity programs on ServiceNow.
Pricing based on BIA volume, plan count, and testing requirements.
