

C1 SmartTables

Unified, Governed Data for Every SmartApp

SmartTables is the standardized, AI-ready data layer powering all C1 SmartApps with governed, version-aware models maintaining clean relationships across controls, risks, evidence, and more.

THE IMPACT

Consistent

Data Across SmartSuite

Reduced

Engineering Overhead

Stronger

Audit Trails & Lineage

■ Core Capabilities

- Dynamic field inheritance across SmartApps
- Standardized schema with governance rules
- Version-aware records with full lineage tracking
- Cross-module relationship mapping
- Framework overlays (FedRAMP/NIST/SOX/ISO/CMMC)

■ Key Outcomes

- Consistent, high-quality data across the SmartSuite
- Reduced engineering and maintenance overhead
- Stronger audit trails and lineage for compliance
- Faster SmartApp development cycles
- Reliable datasets for automation and AI models

Governed Data Model

Replaces custom, inconsistent tables with a standardized, version-aware schema across all SmartApps.

Cross-Module Mapping

Clean relationships across controls, risks, evidence, issues, policies, and entities with full traceability.

AI-Ready Datasets

Normalized data structures optimized for SmartPolicy, SmartCitation, SmartAuditor, and AI automation.

KEY USE CASES

- Unified data layer providing one governed model across all C1 SmartApps
- Entity governance with consistent metadata for multi-tenant and multi-entity programs
- Versioned controls and risks maintaining accurate lineage for audits and attestations
- AI mapping enablement providing clean data for SmartPolicy, SmartCitation, and SmartAuditor

Why C1Secure

Single Trusted Dataset

Every SmartApp operates on the same governed, version-aware data model.

Multi-Tenant Ready

Multi-entity and multi-tenant support with consistent metadata across all programs.

Platform Foundation

The data layer that makes every other C1 SmartApp faster to build, deploy, and maintain.

The governed data foundation powering every C1 SmartApp.

Included with all C1 SmartProducts (core SmartCore component).
